CPE America locates headquarters in Metter, Georgia

Metter, GA (06/17/2015) -- CPE (Concrete Pump Engineers) America President Sebastian Falzon announces the opening of its headquarters in Metter, Georgia. The company finalized a deal with Candler County Industrial Authority on Friday, June 12, to lease-purchase a 42,000 sq. ft. spec building on 16-acres of land in the Candler County Industrial Park.

The company's decision to locate in Metter, Georgia, was due in large part to the community's easy access to the Savannah Ports.

"We needed to be near a port that handles flat racks and containers," said Falzon. "We also needed to be close to the interstate, but not more than an hour from the port. We wanted to be in a right to work state and in a small community. This is a family business, so we want to be good corporate citizens."

"The Georgia Ports Authority welcomes CPE America's headquarters in Metter, Georgia," said Cliff Pyron, chief commercial officer, Georgia Ports Authority. "We are proud to have CPE as a customer, utilizing both our Ocean Terminal and Garden City facilities. We look forward to a long and prosperous relationship with this exciting new opportunity."

"The Candler County Industrial Authority is excited that Metter will now be the new headquarters for CPE America," said Hannah Mullins, executive director of Candler County Industrial Authority.

"We are delighted to have CPE America in Metter. We welcome Sebastian to our community and appreciate his confidence that Metter is the ideal location for his business," said Mayor Billy Trapnell, chairman of the CCIA. "With the current economic upturn I am sure the need for concrete pumps will keep his business growing."

About CPE America

CPE (Concrete Pump Engineering), specializes in concrete pumps that are used in construction projects from housing to commercial and industrial. The pumps reach heights of 21 meters to 65 meters (up to 200 feet).

CPE America is the authorized distributor of Everdigm concrete pumps in North America. Everdigm is an international leader in concrete pumps, hydraulic attachments, tower cranes and more. They will partner with CPE America in bringing their products to the United States.

CPE America will sell Everdigm Concrete Pumps and provide spare parts and service to customers across America for all makes and models of concrete pumps.

The expansion into the American market follows the partnership of CPE Australia with Everdigm.
